## Projects / Papers Presented

---

### **Homyz - a mern stack real estate app**

<https://real-estate-app-9j2l.vercel.app/>

- Using this app people can search for locations for renting
- If the person is a user in site they can add thier own residency in the app
- It uses mongo db as the database
- Site has animations which is done using framer motion
- we can search any residency and can see it location n the map
- It uses Auth0 for authentication

### **Drokygram - a MERN social media application**

<https://github.com/vishnus111/drokygram>

- This application has a register page with complete validation and functionality to upload image
- We can see others post, like, comment
- we can also view profile,It has a dark and light mode functionality
- It uses formik for form validation,react dropzone for image upload
- It use jwt for authentication and multer for file upload

### **Threads - A next js threads clone app**

<https://github.com/vishnus111/threads-clonem>

- Using this app people can share their thoughts ,threads
- People can comment on others posts
- We can create organisation and add people and mange them using clerk
- It uses clerk for the authentication
- It has an activity page in which we get notifications if other comment or like our thread

### **Fiverr - a MERN Fiverr clone application**

<https://github.com/vishnus111/fiver-clone>

- This application uses mongo db as the database ,we can add and remove gigs like the site
- It has a stripe payment system
- we can add and remove review on the gigs
